

Marius Nouchet

A proactive and adaptable learner with a strong problem-solving mindset, always eager to refine technical expertise.

WORK EXPERIENCE

Full Stack Developer

Investissement dans la Fibre des Territoires, Full-time

April 2024 - Present · 1 year

- Developed software applications using [Vue.JS](#), [React](#), [Express.JS](#) to control and monitor the deployment of optical fibers in France.
- Implemented a real-time monitoring system using [RabbitMQ](#), specifically to handle retry mechanisms for external API requests, ensuring reliable data fetching and fault tolerance.
- Automated User Interface documentation redaction using [Playwright](#) and a custom-built [testing](#)-like library.

Full Stack Developer

Logimaker, Freelance

August - September 2023 · 1 month

- Developed a responsive, user-friendly interface using [React](#) to enhance cosmetics inventory tracking and management.
- Implemented an interactive, dynamic data table that allows users to efficiently search, sort, and filter products based on multiple criteria.
- Conducted extensive debugging, troubleshooting, and performance optimization, ensuring high reliability, fast load times, and smooth user experience.

Full Stack Developer

MyDemenageur, Freelance

March - June 2022 · 4 months

- Developed and integrated a [real-time chat](#) system using [WebSockets](#), enabling seamless instant messaging between users and service providers throughout the moving process.
- Optimized [SEO strategies](#) by implementing structured data, meta tags, and keyword optimization, enhancing search engine visibility and attracting a higher volume of potential customers.

Full Stack Developer

Feldrise, Internship

January - March 2022 · 3 months
