Marius NOUCHET

About me

My passion for tech was ignited in 2013 and has been burning for over seven years. Thanks to persistent self-taught learning and hands-on experience, I've honed my skills and specialized as a full-stack developer over the past four years.

Experiences

Freelance Full-Stack Developer

Logisoap • August - September 2023

Implementation of a customized inventory and forecasting application for the cosmetics industry, featuring a user-friendly interface for efficient inventory management, an intuitive dashboard for product sorting and filtering, a predictive module for inventory forecasting, and increased system reliability thanks to bug fixes and performance improvements.

Freelance Full-Stack Developer

MyDemenageur • March - June 2022

Development of a B2B and B2C moving services platform based on an agile approach, including instant messaging for user communication, SEO practices for improved online visibility, and improved platform responsiveness for a seamless user experience across all devices.

Full-Stack Developer

Feldrise • January - March 2022

Transitioned to freelancing with an internship focused on project management and web/mobile development, during which I created a portfolio website, explored Flutter for app development, and helped build a B2B/B2C moving services platform.

Back-End Developer, Software Engineer

CG Services • October - March 2021

Development of basic solutions for production management and PLC control applications, integration with various systems and databases for SKF and RICARD.
